

# SINK CARE GUIDE - GRANITE

Thank you for choosing a quality Sinx by Totara sink.

**YOUR NEW SINX BY TOTARA SINK IS MADE WITH PRECISION USING QUALITY MATERIALS. THIS CARE AND MAINTENANCE GUIDE WILL HELP ENSURE YOUR SINK LASTS AS LONG AS POSSIBLE.**

## GRANITE SINKS

**Sinx by Totara Noir granite sinks are made to be very durable and resistant to heat, dents and chips. If cared for correctly, they will maintain their colour and resist stains for many years. To keep your Noir granite sink looking great, follow these simple care guidelines.**

- For everyday cleaning we recommend that you rinse your sink after each use.
- Use a small amount of dishwashing liquid and a soft nylon brush (if needed).
- Dry with a micro fibre cloth.
- We recommend that you use our granite sink cleaner paste for a deep clean (every month).
- To restore the surface of your sink after a deep clean, apply food grade mineral oil with a soft cloth, then buff off.
- Keep your sink dry when it is not being used to prevent water and lime deposits building up and becoming difficult to remove.
- Try not to drop sharp objects into your sink.
- Do not pour paint or grout materials into your sink.
- Never use harsh abrasive cloths.
- Avoid using ALL household cleaning agents, especially those that contain chlorine or have a high content of alkaline.
- Hard water makes the build-up of lime more prevalent (seen as a white film on your sink).  
To avoid this you should wipe, rinse and dry your granite sink after each use.

**We hope you enjoy many years with your Sinx by Totara sink.**
